c)	Igelit.	The "weichgemachte" Igelit is sent to the USSR in 100 kg. dr	runs
		manufactured by the Sobler works at Stassfurt.	

- d) Soda lye, butyl acetate, ethylene glycol and paraldehyde are all sent to the USSR. 50X1-HUM
- e) Chloride of aluminum and "glysantine" are sent to Czechoslovakia and Poland.

4. Power supplies.

- a) Consumption averages 102 million KWH a month.
- b) The factories own power stations produced the following power in May and June 1948.

May 1948 June 1948 66.9 million KWE

Coal is supplied from the local open-cast workings.

c) The remainder of the power is supplied from Zschornewitz power station, via a 100 KV circuit.

5. Steam and Water supplies.

a) Steam production in May and June 1948 was as follows:

May 1948 June 1948 538,426 tons

573,017 tons

under a pressure of 100.16 and 3.5 atmospheres.

b) Water consumption was as follows:

May 1948 June 1948 1,132,700 cu. meters. 872,000 cu. meters.

Water is supplied by 2 pumping stations from the Saale.

6. Raw Materials.

- a) Limestone daily requirements 1,000 tons.

 This is supplied from the factory's quarry at Rübeland/
 Harz and is delivered in special Reichsbahn trucks to the works.
- b) Coke daily requirements 5-6,000 tons.

 No deliveries have taken place from the Ruhr or Weldenburg since June 1948. Stocks in August 1948 could be reckoned as sufficient for a further 6 8 weeks.
- c) Anthracite stocks: none.

 No deliveries were taking place in August 1948. Experiments with Bohemian lignite proved a failure.
- d) Electrodes Electrodes are manufactured in the works. There is no shortage.
